

GREEN WONDER

Introducing Odor Free Odor Eliminator

THE GREEN SOLUTIONS COMPANY

Green Wonder Odor Eliminator combines a special blend of advanced ingredients that do far more than merely mask the problem — they obliterate it — literally eliminating the odor at its source!

GREEN WONDER OE destroys odors using its powerful enzymes, usually with just one application. Most other deodorizers don't destroy odors; they simply mask them or make your nose less odor sensitive. The result, odors keep coming back and you have to spray again. Other enzyme-based deodorizers contain both the enzymes and the bacteria that produce them. The bacteria are stressed or starved to produce the enzymes. However, when the product is applied, the stressed bacteria get fed. They then stop producing the enzymes and the product stops working.

These other products often take repeated applications and up to two weeks to work. **GREEN WONDER OE** works in seconds and usually needs only one treatment. **GREEN WONDER OE** provides safe truly effective odor elimination at a competitive price. Safe for use around children and pets.

GREEN WONDER OE was developed to combat airborne bacteria and germs in hospitals and health care facilities. Now it's available for your home, car, office, and RV use. This unique product that cleans the air you breathe. It is proven to eliminate odors, unlike current fragrance products, that just mask odors.

GREEN WONDER OE penetrates into the pores of fabric, rubber and even hard surfaces to eliminate odor naturally. The blend of unique enzymes and chemicals are fast, effective and completely safe for the environment, leaving only CO2 and water as by-products.

Product Benefits

- Controls Odors
- Easy to use
- Safer than chemicals
- Biodegradable formula
- Neutral Scent
- Eliminates all Pet & Organic Odors
- Environmentally Safe
